# Nivo Slider Settings

The Nivo Slider has plenty of settings to fiddle with. Below is an example of the code with all available options and their defaults:

```
$('#slider').nivoSlider({
    effect: 'random',              // Specify sets like: 'fold,fade,sliceDown'
    slices: 15,                    // For slice animations
    boxCols: 8,                    // For box animations
    boxRows: 4,                    // For box animations
    animSpeed: 500,                // Slide transition speed
    pauseTime: 3000,               // How long each slide will show
    startSlide: 0,                 // Set starting Slide (0 index)
    directionNav: true,            // Next & Prev navigation
    controlNav: true,              // 1,2,3... navigation
    controlNavThumbs: false,       // Use thumbnails for Control Nav
    pauseOnHover: true,            // Stop animation while hovering
    manualAdvance: false,          // Force manual transitions
    prevText: 'Prev',              // Prev directionNav text
    nextText: 'Next',              // Next directionNav text
    randomStart: false,            // Start on a random slide
    beforeChange: function(){},    // Triggers before a slide transition
    afterChange: function(){},     // Triggers after a slide transition
    slideshowEnd: function(){},    // Triggers after all slides have been shown
    lastSlide: function(){},       // Triggers when last slide is shown
    afterLoad: function(){}        // Triggers when slider has loaded
});
```

The effect parameter can be any of the following:

- sliceDown
- sliceDownLeft
- sliceUp
- sliceUpLeft
- sliceUpDown
- sliceUpDownLeft
- fold
- fade
- random
- slideInRight
- slideInLeft

- boxRandom

- boxRain

- boxRainReverse

- boxRainGrow

- boxRainGrowReverse
